FOR AMERICAN
RECOGNITION**

COHO HOPES FOR AMERICAN RECOGNITION
(BY CABLE AND ASSOCIATED PRESS)
MEXICO CITY, April 26.—Mexico is the brightest day of her history, and greatest cause of hope for those most interested in the country's welfare that she will make which might on the whole be a step toward the realization of the United States' policy of good will toward all nations.

BRITISH POUR OUT BLESSING ON DUKE AND SCOTTISH BRIDE

(BY CABLE AND ASSOCIATED PRESS)
LONDON, April 26.—The Duke of York and Lady Elizabeth Bowes-Lyon joined hands and hearts before the golden altar of Westminster Abbey today while all Britain poured out its blessings. The magnificent church service that elevated the modest Scotch girl from the common ranks to a place in the crown of the empire would have exalted a king or queen.

MEN OUTSHINE FAIR SEX ON WEDDING DAY

(BY CABLE AND ASSOCIATED PRESS)
LONDON, April 26.—We are seated. We nod and pass this word and that. Outside, all the world and his wife is looking this way. At hand not even an ambassador but a duty impressed, not a dead marble but who wonders if all the plans will go as they should. And, but let us begin at the beginning.

BRIDE'S GOWN SIMPLE

(BY CABLE AND ASSOCIATED PRESS)
LONDON, April 26.—The bride's gown was simple and elegant, and the ceremony was conducted with the traditional precision of British royal events. Only when the bride was called upon by the Archbishop of Canterbury to repeat the solemn ritual beginning: "I take thee, who wonders if all the plans will go as they should."

AMBRASSADORS IN A ROW

(BY CABLE AND ASSOCIATED PRESS)
LONDON, April 26.—There then are the ambassadors sitting in a row of separate stalls, their wives in a rather humid and stuffy atmosphere. Each stall is divided from its neighbor by a few wooden bars, and one could not but wonder whether this was not fortunate in the case of the French and German ambassadors, who, by the account, had a little row.

ABUSE CHARGED AT OKLAHOMA STATE PRISON

(BY CABLE AND ASSOCIATED PRESS)
OKLAHOMA CITY (Okla.), April 26.—A report charging extreme abuse of prisoners at the Oklahoma State penitentiary was submitted today to Gov. J. C. Walton by O. E. Beath, president of the State Federation of Labor, whom the Governor sent to the prison for a personal investigation. The report was sustained by twenty-five affidavits of prisoners who related asserted tortures inflicted on inmates of the institution.

SEATTLE SITUATION

(BY CABLE AND ASSOCIATED PRESS)
SEATTLE, April 26.—Continued and intensified defections of employees of logging camps in Washington from the general strike called by the Industrial Workers of the World were reported today in Seattle. The defections were estimated the number of the strikers on this Tuesday for between 5000 and 10,000.

Do You Want to See This in Our Schools?

CALL DAVID CULT A HOAX

(BY DONALD EWING)
FOLLOWERS OF Purnell Begin to Realize They Have Been Victimized, Hearing Develops
ST. JOSEPH (Mich.) April 26.—Romance, tragedy, love and disillusionment pushed their way today into the State's investigation of the David cult, the stories ranging from a wheelbarrow eulogy to a couple wedded, but not to each other, to the tragic realization by followers of "King Benjamin" Purnell that they were not disciples of Jesus Christ's younger brother, but the victims of a gigantic religious hoax.

EARLY WAR PLANS LAID TO AMERICA

(BY CABLE-EXCLUSIVE DISPATCH)
BERLIN, April 26.—The Germans assert they have discovered proof that America was prepared to enter the World War in January, 1915, long before the German U-boat threats, and they are publishing a document, asserted to have been found on board an American steamer.

St. Louis Bank Theft Suspect Sought in Paris

(BY CABLE-EXCLUSIVE DISPATCH)
PARIS, April 26.—A mysterious Capt. Smith, alias John, who is asserted to have sacked a bank at St. Louis, Mo., in 1920, and to have fled from America with \$200,000, is being sought by the Paris police as the head of an international gang of swindlers which was rounded up this week.

ASSOCIATION TO AID HIGHWAY FORMED

(BY A. P. NIGHT WIRE)
SACRAMENTO, April 27.—The Utah-Nevada-California Highway Association, organized for the purpose of obtaining financial aid from the Federal Government for the construction of the Victory Highway through the California State Highway Commission, is named as one of the directors of the association.

ALL AMERICANS TOLD TO FLEE FROM COUNTRY

(BY CABLE AND ASSOCIATED PRESS)
HARBIN (Manchuria) April 27.—S. Pinkney Tuck, American Consul at Vladivostok, has announced that he is leaving the soviet Far Eastern capital with his staff May 1 and has advised all Americans in the country to do likewise, according to advices received today. It also was stated that Vice-Consul Edward B. Thomas, stationed at Chita, is leaving on the same date.

NEW DEVICE WILL LOCATE SEA WOLVES

(BY CABLE-EXCLUSIVE DISPATCH)
PARIS, April 26.—A new submarine-detecting device has been perfected by Prof. Langevin, which, in the opinion of the French Naval Ministry, will revolutionize all naval warfare. The Langevin device is a simple apparatus that can be attached to any ship and constantly registers the exact location of a submarine within ten miles or more.

MAX LINDER HUNTED FOR ELOPEMENT

(BY CABLE-EXCLUSIVE DISPATCH)
PARIS, April 26.—Max Linder, noted French film comedian who formerly played with Essanay at Chicago, has eloped. A general alarm was sent out a week ago, but after strenuous efforts by the police of all European capitals the comedian has not been found.

DISCOVERER EXPLAINS

(BY CABLE-EXCLUSIVE DISPATCH)
PARIS, April 26.—Prof. Langevin explains the working of his device. "Radio furnishes the means to produce Hertzian waves, but not ultra-sonorous waves. Suppose we have in our disposition a generator of electric oscillations of high frequency, like Hertzian waves. The machine I have constructed, forms the energy of these oscillations into ultra-sonorous waves of high frequency in the form of an oriental fan. These waves send back echoes, and by measuring the time elapsed and knowing the formula, we would get the exact distance. The waves can be broadcast or concentrated in a single direction."

ANOTHER INVENTION

(BY CABLE-EXCLUSIVE DISPATCH)
PARIS, April 26.—Upon inquiry at the American naval headquarters in Paris, an extraordinary coincidence was disclosed. Prof. Langevin says: "I wish to express my warm agreement with what Senator Borah has recently said and what I sincerely hope that the approval of the League of Nations will be to this international court, which represents the highest point yet reached by mankind in the science of international law, and which has been so effective in doing away with private war among nations."

BORAH LAUNCHES FIGHT

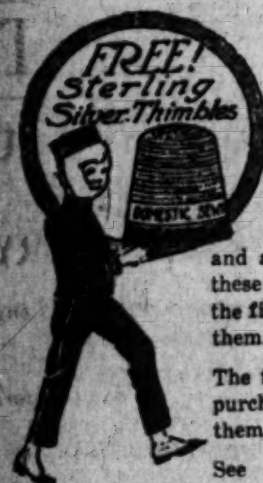

(BY A. P. NIGHT WIRE)
WASHINGTON, April 26.—Senator Borah of Idaho, a leader of the Republican irreconcilables in the Senate fight over the Treaty of Versailles and its League of Nations covenant, tonight inaugurated his campaign of opposition to the administration proposal that the United States accept membership in the permanent Court of International Justice, the world arbitration tribunal set up under the League.

Irreconcilable Senator in Statement Sees No Good in Stand of President Harding

(BY A. P. NIGHT WIRE)
WASHINGTON, April 26.—Senator Borah of Idaho, a leader of the Republican irreconcilables in the Senate fight over the Treaty of Versailles and its League of Nations covenant, tonight inaugurated his campaign of opposition to the administration proposal that the United States accept membership in the permanent Court of International Justice, the world arbitration tribunal set up under the League.

Hamburger's
ESTABLISHED 1881

NOTICIAS MUNDIALES DE ULTIMA HORA

En obsequio a nuestros numerosos amigos de habla española, y para beneficio de los lectores americanos del Times que estudian con interés, publicamos diariamente esta columna en castellano, con un extracto de las más importantes noticias de última hora.

En conocimiento práctico del español es de grandísima utilidad en este país, especialmente en el suroeste; como lo demuestra el hecho de que en Los Angeles solamente hay más de 15,000 personas que estudian ese idioma con profesores oficiales o particulares. Para esos estudiantes será un buen ejercicio leer todos los días esta sección, donde encontrarán las palabras y frases más usuales del lenguaje español.

NOTAS TELEGRAFICAS

Noticias de Washington

WASHINGTON, abril 26.—El Presidente Harding se está preparando para un vigoroso esfuerzo dirigido a aumentar la eficacia del cumplimiento de la ley de prohibición.

El Senador Borah dice que, de entrar los Estados Unidos en el Tribunal Mundial, no podrá escapar de la Liga de Naciones.

A. D. Laaker ha presentado al Presidente su dimisión como director del Consejo de Navegación de los Estados Unidos, la que será efectiva al próximo 1 de julio.

John Barton Payne y C. B. Warren, Comisionados a México, han recibido ya instrucciones del Ministro Hughes.

El Ministro Denby ha anunciado que el gobierno tiene decidido llevar a cabo el programa de modernización de la flota, sin previa específica opinión del Congreso.

El Senador de Mississippi Apiaude la Reconstrucción de Harding.

JACKSON (Miss), abril 26.—"Me complice ver que el Presidente Harding ha encontrado uno de los puntos del programa republicano, y que va a procurar cumplir con una de las obligaciones de su partido, aunque con ello lo desbarate", dijo el Senador Pat Harrison hoy, después de leer el discurso que pronunció el Presidente el martes en Nueva York.

Matrimonio del Duque de York.

LONDRES, abril 26.—Con toda la pompa y todas las ceremonias reales, el Duque de York, hijo segundo del Rey Jorge y de la Reina María de Inglaterra, y presunto rey del propio país, en caso de que su hermano mayor muera sin sucesión antes que el, celebró hoy su enlace con Lady Elizabeth Bowes-Lyon, una de las más bellas de su padre, en la Abadía de Westminster, donde innumerables generaciones de sus antepasados se casaron antes que él, y donde muchos de ellos están sepultados.

Tránsito del Concorde la Rendición del General Green.

CIUDAD DE MEXICO, abril 26.—El General Torres, acompañado de fuerte destacamento de tropas regulares, ha salido para el Estado de Tabasco con el fin de celebrar una entrevista con el General Carlos Green, connotado líder rebelde. Se dice que el General Green estaría dispuesto a rendirse mediante ciertas condiciones; pero en caso de que no lo haga, las fuerzas federales van a anular su suelta campaña contra él, a fin de poner término a su actitud.

Terrorismo en Sicilia.

MESSINA, abril 26.—Un temblor de tierra sacudió hoy la costa oriental de Sicilia, y vino acompañado de erupciones de los Montes Etna y Stromboli.

NOTAS LOCALES

Encarcelados en Honduras que se Tornen Provocaciones con Clara.

Ayer expresaron temores las autoridades de Honduras de que los protectores de Clara, reclutados en el mundo del vicio, tratan de arrebatar a la homicida del marido de entre las manos de los agentes policíacos de California que se hallan en Honduras, pues se recibió en este último país noticia fidedigna de que toda una banda de malhechores de alta escuela estaba y está aún intercediendo en que la criminal se escape. Esta alarma ha crecido de punto al convenir los investigadores en que tienen realmente pruebas de que la fuga de la Sra. Phillips de la cárcel del condado fue preparada con amplitud de recursos pecuniarios, y realizada bajo la directa inspección de la banda de gente maleante.

Cierto es que, ni el Sheriff Trueser, ni el Subsheriff Biscailon, quisieron entrar en pormenores, pero ambos convinieron en que el pendiente viaje de regreso de la profuga asesina constituye una empresa peligrosa, y en que están tomando toda suma de precauciones para proteger las vidas de los que fueron a gestionar la extradición.

Orden de Aprehensión por Vagancia contra Platin.

El Juez de Policía Chambers expidió ayer nueva orden de arresto contra Platin, acusándolo en esta ocasión de vagancia. Este individuo es de el título de "administrador" de la huelga de operarios de fábricas de ropa, y sus pasos han estado sometidos donde hace tiempo a continua vigilancia policíaca. Se le aprehendió el miércoles, acusándolo de supuesto robo de ropa, y salió en libertad mediante un escrito de habeas corpus. La audiencia para conocer de este recurso fue fijada por el Juez Crall para a las 9:30 a.m. Ayer se expidió también orden de arresto por vagancia contra K. Golub, presunto organizador I.W. W., que se dice ha estado ayudando a Platin a patear la huelga general a la que fueron convocados por el último 4500 miembros de los Operarios Amalgamados de Fábricas de Ropa de América. Platin ha estado trabajando entre dichos obreros desde hace varias semanas, presentándose como el jefe de la ciudad unida; pero los directores de la casa matriz de la misma en Chicago niegan que haya sido autorizado para esa misión.

Algunos Trabajadores Abandonan sus Tareas en el Puerto.

Más de 1500 trabajadores marítimos y del puerto dejaron ayer sus empleos. Fue el primer día de la huelga que entre los operarios marítimos de toda la nación ha sido convocada por los Trabajadores Industriales del Mundo. En contra de lo que se esperaba, el tráfico de cabotaje fue el más afectado por este paro. Con todo, los barcos madereros continuaron su trabajo, y se dice que los bien concertados tentativas de los rojos para insuflar esta clase de embarcaciones.

DEPORTES

Carreras de Autos

Parece que Jimmy Murphy ha adquirido la costumbre de llegar al primero, y no puede abandonarla. Lo hizo de nuevo ayer tarde en Fresno, ante la enorme muchedumbre que había en el autódromo de esta población, y corrió las 150 millas de la clásica del Día de la Uva en 1h. 24m. 55s. Casi en toda la carrera se mantuvo adelante. En sus talones venía Eddie Hearne, que ya ganaba carreras cuando se fue a la escuela en su cochecito de bebé. Benny Hill, ganador de la anterior carrera de Fresno, venía en tercer lugar. Earl Cooper en cuarto, Frank Elliott en quinto, y Joe Thomas en sexto.

Baseball

El equipo de baseball de la Universidad de Sudcalifornia, a las órdenes del instructor Wheeler, derrotó a los de la Universidad de Los Angeles, 7 por 0, en un partido de tres juegos.

Golf

El Club de Anunciadores va a abrir el torneo del Club Campestre que el sábado, cuando los torneos que haya en todos los torneos que se juegan en Francia, este verano, diez minutos de descanso después de la tercera serie en los partidos de tenis que se disputen jugadores del sexo fuerte, y un descanso de la misma duración después de la segunda serie en los partidos de jugadores. Esto se ha estado haciendo desde hace muchos años en los Estados Unidos.

Tennis

El Secretario de la Asociación de Lawn Tennis Australiano anunció ayer que estaba casi seguro de que el equipo elegido por Norman Brookes, y que se compone de James Anderson, J. R. Hawkes, Schweninger y I. D. McInnis, va a representar a Australia este año en el juego de la Copa Davis.

BROKERS ARRAIGNED ON LIQUOR CHARGES

(BY A. P. DAY WIRE.)

SAN FRANCISCO, abril 26.—Peter and Thomas McDonough, brothers, prominent here as bail bond brokers and politicians, appeared in the United States District Court today to be arraigned on a charge of violating the Volstead Act. It is asserted by Federal prohibition officials that they engaged in bootlegging operations extending from British Columbia to San Francisco.

The court set Saturday as the date on which they shall plead.

FORESTER GETS MEDAL

(BY A. P. DAY WIRE.)

WASHINGTON, April 26.—The Distinguished Service Medal has been conferred on William B. Greeby, Chief Forester of the United States, who had charge of forestry forces in France during the war.

MURPHY WINS FRESNO RACE AND MILTON IS HERO OF A NEAR ACCIDENT

HEARNE FAIRLY CLOSE

and Cooper in Battle for Third Money

His Busy Jinx Nearly Spills Everybody

Cliff Durant Collects Most of the Cash

BY PAUL DOWRY
(SPECIAL REPORTER)

FRESNO, April 26.—In a surprise race at the annual Fresno race track, Eddie Hearne was second, finishing a lap behind and lost his lead by three laps. The race was a 100-mile event, and the winner, Cliff Durant, collected the most of the cash.

NO STOPS

After Murphy, nor Hearne, did stop at the race track. They drove a cool, steady race, and the winner, Cliff Durant, collected the most of the cash.

DE PALMA'S CARS DONE

Tiny Racers Ready for Their Trials

PHILADELPHIA, April 26.—Four, perhaps five, world's records, are trembling and ready to topple in the twenty-ninth annual Penn relay carnival which opens tomorrow.

With the magnificent new stadium groomed and ready for the fray, the greatest army of athletes ever assembled, save at an Olympic, is gathering to compete. Thirty-five hundred athletes, including the 600 substitutes, are ready for the eighty-eight events.

One hundred and forty college teams representing 108 American and one British school, 208 high schools, sixty-nine preparatory schools represent every district of the United States, with two Canadian schools entered. Besides these are eighty-five Philadelphia grammar and thirty-four Philadelphia parochial schools represented by one or more teams.

RECORDS TO FALL

With favorable weather, which is now predicted, it is believed that the hammer, javelin and discus records will fall, and it is predicted that the one and two-mile relays and the international two-mile mark will be broken.

The sensation of today, with the army of athletes swarming to the final practice on Franklin field, was Tootle of Bowdoin, who, in his warming-up, heaved the hammer 181 feet, and seemed not to have reached his limit.

They were released today. They reveal the typical lines of the Packard hood, and an extremely neat job of streamlining on the distinctive body. De Palma's own experience in building such cars as the big Packard he sets records with on Ormond beach is plainly evident in the lines of the little cars. The body is extremely narrow, and gives the front view of the car the effect of having an abnormally wide tread.

The mechanical details of the motors are being kept a very profound secret by the Packard engineers. They are tiny single-cylinder, however, whereas most of the contenders will be of the eight-inch type. It is known that the maximum motor speed of the little jobs reaches the tremendous figure of 5600 revolutions per minute, and the Packard engineers are very confident that they will give a good account of themselves on Memorial Day.

During his recent visit to Los Angeles, Col. Vincent expressed himself as being confident that the 122-cubic-inch cars will eventually prove themselves as fast or faster than the 182-inch jobs. "They may not do it this year, for we have a lot to find out yet about these very small motors, but in the course of a year or so, I expect to see the little cars surpass the old records," Col. Vincent declared.

If there is anything in experience, the Packard racing team should stand an excellent chance. Both De Palma and Reed, who will drive Packards on Memorial Day, have won the Indianapolis classic once, and both are eager to repeat the performance. Nobody has yet achieved the distinction of twice winning the 500-mile race, but De Palma and Reed are going to make a desperate effort to do it this year. Joe Hoyer, who is the third member of the Packard team, has never won at Indianapolis, but he has driven there several times and is thoroughly familiar with the track.

The third season is called for Friday morning, June 1, at the same time as the basketball coaches are meeting.

The meeting of the basketball heads will be for the purpose of arranging dates for the games, which have been scheduled under the three-year plan. Officials will also be chosen at this time.

A joint meeting of the directors and basketball coaches will be held. Matters relating to basketball will be discussed. Principal among them being the new rule ruling recently adopted at the New York meeting which included representatives of the N.C.A.A.

CLIFF ARGUE OCCIDENTAL CHIEF POINT WINNER ON THE TRACK AND FIELD

USC'S GREAT ALL-ROUND ATHLETE

BY FRED MURRAY

STAND for "all-around athlete," also for Anderson and Argue, and Otto Anderson of U.S.C. and Cliff Argue of Occidental are certainly two of the greatest all-around athletes on the coast today.

There has been a lot of talk at the various meets this year as to which is the greater athlete, but unfortunately there has been no competition in which the two have met in more than one of the various events in which they excel.

As it is very improbable that the two will ever meet to decide which is the best all-around athlete, a comparison on paper should be quite interesting, and such a one I shall attempt to make.

In the first place each one is a fine type of athlete, a popular student, a hero in his own home town, a "cheek of the cinderella" as it were. Both have been the biggest point winners on their respective teams this spring, and likewise each was a star football player last fall.

In seven meets in 1922 Otto has scored 38 points for U.S.C., usually winning the broad jump and both hurdle races, and taking second in the 100-yard dash. In 1923, Cliff, though handicapped at the start of the year by an auto accident, collected 31 points for his Alma Mater in six meets, scoring the prodigious number of 45 in the Caltech and Pomona meets alone. They both run both sprint races, though Anderson has only run a 220 in a relay this year. He met defeat at the hands of Argue in the 100-yard dash at the A.A.U. meet in Redlands, and as Kanold's distance runner, he has to have done 22 feet, while Cliff's best time when he finished first is 22 feet 11 inches.

Argue, in the 220, won the conference meet this year. Cliff was just nosed out in the 220 by Campbell in 22 seconds. In my opinion then, the 220 is an undecided event, in favor of neither man.

The hurdles are all Anderson's, for even if Argue ran them, he'd have to be one of the best in the country to beat the fleet Otto. It is here that the U.S.C. youth has won most of his fame, and his times of 15.2 in the highs and 24.1 in the lows are very fast indeed. A noted Western coach, however, has said that if Otto would specialize in the broad jump alone, he would come close to breaking the record.

In this event, the broad jump, Anderson and Argue would meet in an exciting competition. Anderson has the edge, however, as he has jumped 22 feet 11 inches, while Argue's farthest is 22 feet 8 inches. Also, the two met in the broad jump in the 1922 relay carnival, and Otto came out the victor.

The high jump is all Cliff's, as he has done 6 feet 2 inches, while Otto does not enter this event, and can only do about 5 feet 8 inches. Many people think that if Cliff confined his efforts to the high jump he would become one of the country's leading jumpers, as he shows great ability every time he competes, but is usually tired from his races, or hurries to go in some other event. Neither one attempts the pole vault, which probably feels quite slighted at being the only field event not patronized by these two mighty men. In the weights Argue has the advantage, and should win the shot put and the javelin, while Otto should take

Four Records May Fall in Penn Carnival

New Stadium Groomed and Ready for Fray

Lads From Schools Galore in Many Events

BY HUGH FULLERTON
(EXCLUSIVE DISPATCH)

PHILADELPHIA, April 26.—Four, perhaps five, world's records, are trembling and ready to topple in the twenty-ninth annual Penn relay carnival which opens tomorrow.

With the magnificent new stadium groomed and ready for the fray, the greatest army of athletes ever assembled, save at an Olympic, is gathering to compete. Thirty-five hundred athletes, including the 600 substitutes, are ready for the eighty-eight events.

One hundred and forty college teams representing 108 American and one British school, 208 high schools, sixty-nine preparatory schools represent every district of the United States, with two Canadian schools entered. Besides these are eighty-five Philadelphia grammar and thirty-four Philadelphia parochial schools represented by one or more teams.

RECORDS TO FALL

With favorable weather, which is now predicted, it is believed that the hammer, javelin and discus records will fall, and it is predicted that the one and two-mile relays and the international two-mile mark will be broken.

The sensation of today, with the army of athletes swarming to the final practice on Franklin field, was Tootle of Bowdoin, who, in his warming-up, heaved the hammer 181 feet, and seemed not to have reached his limit.

They were released today. They reveal the typical lines of the Packard hood, and an extremely neat job of streamlining on the distinctive body. De Palma's own experience in building such cars as the big Packard he sets records with on Ormond beach is plainly evident in the lines of the little cars. GASOLINE ALLEY—

He's Just Covered With Symptoms

REG'LAR FELLERS

Eggs Are High Enough Now

Lady Luck—just—nearly around: H. A. Talmage won \$1000 at Lisbon fight over to Monte Carlo 150,000 francs on three little wheel.

riding master weds Mat... Max Oser, who is no... the Rockefellers, by marriage.

and time for twelve young... German police dog belonging... man has thirteen babies... and twelve survive.

Overton comes home. The famous Yale runner and Corps hero is brought back from his burial in American soil. Lieberman was killed in Soissons, July.

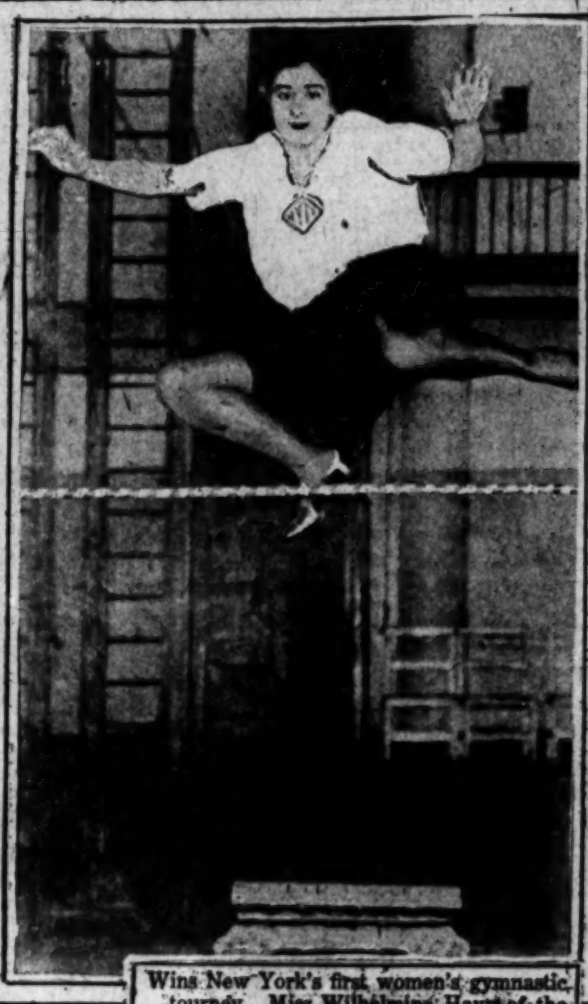

Men, Women and Things in the World's News

Jack Luck just naturally follows him around. H. A. Talmadge of Toledo, O., won \$1,000 at Lisbon casino, then went east over to Monte Carlo and garnered \$100,000 francs on three turns of the roulette wheel.

Seeks Sorbonne degree. Miss Chloe Owings, Knox College graduate and World War relief worker, competes with men at great French university.

Wins New York's first women's gymnastic tourney. Miss Wilhelmina Hayt of the New York Turn Verein, scored over a large field.

Washington girls form Anti-flirt Society. Here is a member talking to a traffic officer regarding men—perhaps. Come to think of it, perhaps that sign means something.

Stalling mother weds Mathilde McCord. Mrs. Over, who is now related to the Rockefellers, by marriage.

Offers to wed unmarried mother for the "honor of the Army." Sergt. Haydel Looney, Eighteenth Infantry, U.S. Army, says he will marry Sophie Breithach, now held at Ellis Island with her baby. She says the babe is the child of an American Army officer, whom she loved, not wisely, but too well.

Sergeant in U. S. Army granted leave to celebrate his golden wedding anniversary. Sergt. James H. Johnson, 75 years of age, a Civil War veteran, has served sixty years in the Army, having enlisted at 15 years of age.

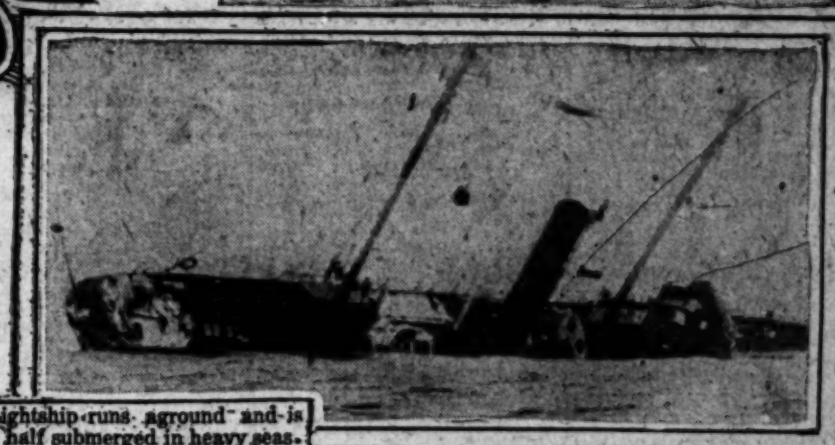

Jack Hillman, noted San Francisco bartender, sings for KJL, The Times radio-phone.

Police for twelve young ones. "Roos," police dog belonging to New York, has thirteen babies left by dog and twelve survive.

Thirty-month-old twin falls from second-story window; twin sister nurses her. Frances Lundgren leaned too far out of the window and fell to areaway below. Happily she escaped with minor hurts. However, her twin sister insists that she do the nursing, and that Dolly go to bed with Frances.

Lightship runs aground and is half submerged in heavy seas. Remarkable photo of the relief lightship No. 90 grounded in Quicks Hole off Massachusetts coast. The crew was rescued by a Coast Guard cutter.

Overton comes home. The body of Marine, Yale runner and Marine hero is brought back from France buried in American soil. Lieut. Overton killed in Soissons, July, 1918.

At national convention of Methodist Church in New York. Bishop L. B. Wilson, who presided (center), and Dr. Louis Hartsook (left) and Dr. P. C. Wyant, speakers.

Naval Wage Board meets. Seated, left to right: F. S. Curtis, chief clerk of the Navy Department; A. F. Berres, chairman of the board; Asst. Secretary of the Navy Roosevelt; and Admiral Strauss; standing: N. G. Bergman, recorder and chief of appointments, Navy Department, and Capt. Willard.

SUPERIOR COURT FOR LONG BEACH

Richardson Signs Bill to Create Bench

Annual Saving of \$200,000 is Expected

Movement Was Sponsored by Southern Men

(EXCLUSIVE DISPATCH) LONG BEACH, April 26.—Organization of a department of the Los Angeles county Superior Court at Long Beach is authorized by a bill which became law today when Gov. Richardson signed the measure at Sacramento.

It is expected by Frank F. Merriam, speaker of the Assembly, and State Senator Joseph A. R. Long, both of Long Beach, that an annual saving of more than \$200,000 will be realized by Long Beach citizens through establishment of a department of the court in the beach community.

It is expected the new court will be ready for business by July 1. The judges of the Los Angeles county bench will choose one of their number to occupy the bench here. Judge Reish Clock, recently appointed from Long Beach, is favored.

NEW APPOINTMENTS
The bill recently passed by the Legislature does not specifically mention Long Beach, but provides that a Superior Court branch may be established in any city of 50,000 population located more than fifteen miles from the county courthouse. Long Beach is the only city in California to which this applies.

The new court will bring with it branches of the sheriff's office, the district attorney's office and justices of the peace, and means several additional appointments for Long Beach.

At a meeting of the Long Beach Bar Association tonight a committee was appointed to confer with the Board of Supervisors concerning suitable permanent quarters for the court.

Strong support was accorded the bill by virtually all members of the Los Angeles county legislative delegation and Gov. Richardson indicated his approval of the bill by making it a law as soon as possible after its adoption by both Senate and Assembly. Merriam of the measure were presented informally to the entire Legislature at a banquet given in the Sacramento Hotel several weeks ago, at which Mr. Merriam and Mr. Long, who were the hosts and a number of prominent Long Beach business men, attorneys and civic representatives delivered addresses.

SAVES MONEY
According to those supporting the bill, hundreds of thousands of dollars have been spent each year by Long Beach litigants in transportation expenses in going to and from court, in the transportation of witnesses and in costly delays. Installation of a permanent court at Long Beach is expected not only to save the added expense of litigation but also to result in expeditious disposal of litigation in which Long Beach residents are solely concerned.

IDENTIFY WOMAN AND BOY FOUND IN CANAL

MEXICAN SAYS VICTIMS OF ASSAULTED SLAYER ARE HIS WIFE AND SON

(EXCLUSIVE DISPATCH) BAKERSFIELD, April 26.—Mystery surrounding the finding of a woman's mutilated body and the body of her baby boy in a local canal was partly solved here today when J. Luvann, Mexican from Delano, positively identified the bodies as those of his wife and son.

Luvann told police that his wife had left him with another man, Omper D. B. Newell, former Kern County Sheriff, visited the morgue today with Luvann and the identification of the bodies was complete. Luvann gave the police a description of the man.

STREET IMPROVEMENT CONTRACT AWARDED
By a "Times" Staff Correspondent LONG BEACH, April 26.—What was described as the largest street improvement contract ever to be awarded in Southern California, has been authorized by the City Council of Long Beach, in connection with the city's improvement program in the so-called Belmont Shore area, a subdivision on the eastern end of the city, along the beach front. Street and storm drain work and paving contracts were awarded to the Two Miracles Concrete Corporation, the total approximating \$480,000.

The contract, when completed, will not only provide adequate sewer and storm drain facilities for Belmont Shore, but will take care of a large section of Belmont Heights as well, according to James F. Collins, chief engineer in charge of the Belmont Shore project.

THUNDER SHOWERS HIT VALLEY CITY

(EXCLUSIVE DISPATCH) PORTERVILLE, April 26.—Sudden surges of raindrops in the night and again in the afternoon, accompanied by thunder, promises another welcome rain. Clouds hang low over the mountains, with every indication of rainstorms in the hills. Precipitation at this time is \$2.60, as against \$1.32 this time last year. Crops and the country generally are in excellent condition, but another rain would prove of great value.

Massachusetts and Maine observe Patriots' Day April 19.

EARLY DAY STAGE DRIVER PASSES

Pioneer of Time Before Rail Transportation Dies Suddenly

(EXCLUSIVE DISPATCH) VENTURA, April 26.—Joseph Barry, who drove stages in the days before there was a Southern Pacific Railroad up the coast, died suddenly yesterday at his home in Ojai. After stage driving went out of fashion Barry engaged in other work and for years had been with the Pan-American Petroleum Company on their lease near Ojai.

'NICE LITTLE GIRL' RAISES SOME FUSS

Only "She" Lands in Jail and Name is Sam, Wearing Sister's Clothes

By a "Times" Staff Correspondent PASADENA, April 26.—The sprightly and winsome miss who was Annie Davis proved today to be Sam Jarrett, 18 years of age, the possessor of a stylish voice, rather small feet and a perfect figure.

Annie, or rather Sam, is grieving over his woes at the City Jail here today. In place of his resplendent feminine attire he is wearing a pair of patched and somewhat soiled trousers and a shirt which has seen better times. Also, he is awaiting the arrival from Los Angeles of his mother and father, who have promised him that they will be home just this evening.

Sam caused Pasadena police a lot of trouble before he found his way into a cell. This morning several calls reached the police station that a pretty young girl was causing considerable trouble by getting on street cars in various sections of the city and annoying them. Police scoured the town and in the afternoon finally located the trouble-maker at Lake avenue and Colorado street.

"She" was taken to the police station, where "she" confessed that "she" was none other than Sam Jarrett of 122 Arisana avenue, Highland Park. The youth, who that he was wearing his sister's clothes. These were taken from him and he given a cap-off pair of trousers and shirt. However, he is still wearing his white kid slippers. He told police that he had been in the "jail" for fun and declared that "mama" will be worried and he'll be late in getting to his school, if he were not released.

SEWER MEET CALLED
Meeting Scheduled Friday at Huntington Park

(LOCAL CORRESPONDENCE) HUNTINGTON PARK, April 26.—The Central Metropolitan Sanitary District representatives are to meet in the City Hall here Friday evening to take up further discussion of the sewer system, which has been before sessions in different cities in the district within the past few months.

If the plans of the district are carried out, a great sewer system to cover the southeastern section of Los Angeles county, will be constructed. This system would include Long Beach, Huntington Park, Whittier, Compton, Watts, Montebello, Lynwood, South Gate, Selmdale, Cudahy, Bell, Maywood, Culver City, Miramonte, Wilshire, North Hollywood, Artesia, Clearwater, Walnut Park and Bellflower.

It will not, in any way, interfere with the sewer systems already in use in Long Beach, or in contemplation. It is estimated that a sewer of this nature will cost from five to ten million dollars. It would have its outlet three miles into the Pacific Ocean.

J. L. Walton is president and E. L. Hunt is secretary and treasurer of the district.

PUPILS HEAR LINDSEY
Juvenile Court Judge Given Big Ovation at Ontario

(EXCLUSIVE DISPATCH) ONTARIO, April 26.—Judge Ben Lindsey, famous juvenile court judge of Denver, Colo., today addressed a joint assembly of the student bodies of Chaffey High School and Junior College, which packed Chaffey Auditorium to capacity.

Judge Lindsey was scheduled to speak for half an hour, but his ready wit and command of it for an hour and a half and at the close gave him a great ovation.

The speaker told the story of how for more than a quarter of a century he had worked in the interests of children. He was introduced by Judge O. V. Hilton, Ontario, formerly widely known criminal lawyer of Denver.

ROTARY AND LIONS CLUBS IN BENEFIT

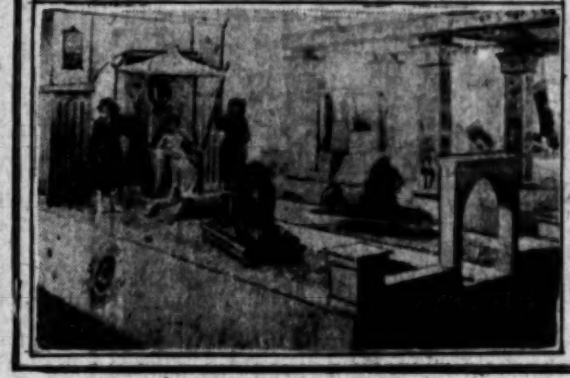

(LOCAL CORRESPONDENCE) WHITTIER, April 26.—A capacity house greeted the big musical show, which was put on here tonight by the Rotary and Lions clubs. The show was a benefit for the Elks Municipal Band.

The entertainment consisted of choruses, quartets, duets, stunts and the usual run of jokes. Lawrence Harris and Bert Hill, Mr. De Grosse directed the choruses. A substantial net was realized from the sale of tickets.

PROSPERITY OF WEST IS SHOWN

March Business Nears Peak of Record Month

Results in Steadily Expanding Bank Credits

Retail Trade Increased by 20 Per Cent

(BY A. P. NOBLE WIRE)

SAN FRANCISCO, April 26.—

Labor was fully employed, wages advanced; practically all lumber mills were in operation; the output of mines increased; prices of the principal metals produced, except silver, advanced; petroleum production established a new high mark, and building permits issued broke all records, according to John Perrin, chairman of the board and Federal Reserve agent.

The Federal Reserve District, whose report for March was issued here today.

The twelfth district comprises Arizona, California, Idaho, Nevada, Oregon, Washington and Utah.

Mr. Perrin says: "Activity of production and trade, which has been marked since the first of the year, was sustained during March, with records of previous years being steadily approached or exceeded, in numerous lines of activity."

LABOR PAID MORE

"Substantial increases in rates of pay to labor in the lumbering, mining and metal trades industries were announced during March. Farmers in many sections are having difficulty in securing adequate help for spring planting and cultural work, because of the relatively low wages paid agricultural laborers."

Lumber production during March was estimated to be 18 per cent above normal for that month. The volume of orders received and shipments made continued greater than production.

"Petroleum production in California at 632,522 barrels per day, established another record during March, and storage stocks, already large, were increased. Prices paid for crude oil in Southern California fields were reduced during the month from 1 to 41 cents per barrel, according to the gravity of the oil."

RECORD IN BUILDING

"Building permits issued during March were greater both in number and value than in any previous month of which there is a record. There were 13,354 permits authorizing construction valued at \$49,245,440 issued in twenty reporting cities."

"Retail trade at department stores, during March, exceeding in value that of a year ago by approximately 20 per cent, was being carried on with stocks only slightly larger than those held."

"The total activity of business in the district, as indicated by debits to individual accounts at banks in twenty-one cities, was 25.8 per cent greater than one year ago, the largest yearly comparison reported since 1920."

"Crops and live stock of the district are in good condition. The past winter has not been severe and early spring weather has been generally favorable."

"The business prosperity reflected in the foregoing comparisons has resulted in a steadily expanding volume of bank credits. In the district, total loans, discounts and investments of sixty-six reporting member banks, located in the principal cities of the district, increased from \$1,289,000,000 on March 1, 1932, to \$1,340,000,000 on April 1, 1933, the latter figure being slightly in excess of the highest previous figure of \$1,321,000,000 reported on December 17, 1932."

"Comparison of the present condition of these banks with their condition then, however, reveals that while total loans and investments are now at the 1926 peak, total deposits at \$1,518,000,000 are considerably above the peak of \$1,185,000,000 reported in the fall of 1926. As a result the total deposits of these banks today are 93.1 per cent of their total loans and investments, as compared with 69.2 per cent at the peak of the credit expansion in 1926."

Wage Increases May Presage Beginning of Inflation Period; Arizona Financing; Stock Issue

Concentration of bankers, business men, economists and speculators of the labor question as the most likely influence in the business situation to presage inflation is apparent from the increasing number of opinions and analyses of wage costs appearing in the financial journals. Heretofore, the rising tendency of prices and the cumulative growth in production of raw and finished materials have the ingredients said to portend undue expansion and agitation in the country's business, but the recent flood of wage increases has turned critical eyes to the new danger.

One authority says that there is a diversified list of industries pointing to a narrowing of the margin of profit from the increased costs of production. The National Industrial Conference Board in its latest wage survey in manufacturing industries reports thirty-seven increases and one decrease between February 15 and March 15, the previous high month in the upward swing. Some of the industries affected were the copper companies both of the Great Lakes and in the Far Western districts; the coal and iron companies of Alabama, the large steel corporations, the textile industries, and the longshoremen of the port of New York.

As enumerated by an eastern banking institution, the wage increases since the month of March, 1932, were in the following enterprises: woolen and worsted, 53; building construction and materials, 44; printing, 26; cotton, 20; metals, mining and machinery, 19; clothing, 6; miscellaneous textiles, 6; silk, 4; leather, 2; paper, 2; rubber, 2; miscellaneous, 7.

The bureau of labor statistics of the Department of Labor states that in March, 1933, there was an increase of 5 per cent in the total wages paid to employees in forty-three industries, as compared with February, and again of 7.1 per cent in the number of employees. In the 1453 representative establishments in the forty-three manufacturing industries surveyed, covering 2,131,544 employees, the total earnings in a one shift operation amounted to \$45,538,778. Identical establishments in February reported 2,092,285 employees and total pay rolls of \$41,968,545.

Increases in the number of employees in March, as compared with February, are shown in thirty-nine of the forty-three industries, followed by brick and tile, 13.1 per cent; steel shipbuilding, 11.1 per cent; and paper and pulp with 5.4 per cent.

Glass, leather and slaughtering and meat packing showed small losses in employment, while chewing and smoking tobacco decreased 6.1 per cent. Increases in the total amount of pay rolls in March as compared with February are shown in every industry except chewing and smoking tobacco. The increases ranged from 19.5 per cent in fertilizers, 14.3 per cent in brick, 13.1 per cent in steel shipbuilding and 11.5 per cent in millinery and lace goods to less than 1 per cent in pottery.

ARIZONA FINANCING

Representatives from seven Los Angeles investment houses will leave this evening for a short trip to Arizona to investigate conditions in the Salt River Valley, the heart of Arizona's rich agricultural section. The party will visit the Roosevelt Dam, the power project there, and some of the large farming enterprises in the valley.

Officials and salesmen will go from M. H. Lewis & Co., Banks, Huntley & Co., Carstens & Earles, Inc., Stevens, Page, Drake, Riley & Thomas, Citizens National Bank and the California Company.

The Roosevelt project, said to be the most successful project ever undertaken by the United States Reclamation Service, consists of the Roosevelt Dam and distributing system, serving 233,392 acres of highly productive and intensively cultivated lands. In addition to the distributing system, the project owns a hydroelectric power system of five power plants which delivered 25,400,000 K.W.H.P. of electrical energy during the year 1932. This project was constructed under the supervision of one of the most eminent hydraulic engineers in the country, at a cost of over \$11,250,000.

The project was acquired by the Salt River Valley Water Users' Association, under contract of purchase from the United States government for the sum of \$10,146,121.37 annually on account of this purchase are being made on the basis of 3 per cent of the principal net income, payable each year without interest on the deferred payments.

Recently the farmers have voted to add to the capacity of Roosevelt Reservoir, to increase the output of the present power plant and to build another storage and power dam of the Salt River. The cost of this work will be met in such a way that the power developed will pay the bonds and interest. The income from the power alone is expected to reach \$100,000 annually. This power will also go toward paying the annual installments due to the government and may reach a figure which will insure the farmer getting his water at practically no cost.

The entire financing of these new developments is to be taken care of by a syndicate of Los Angeles bond houses, represented by the group which is sending today's expedition to Arizona.

STOCK ISSUE

Authority to issue \$1,850,000 of class "A" preferred and \$1,000,000 of class "C" preferred stock to the Union Oil Company has been granted by the Outer Harbor Dock and Wharf Company of Los Angeles by the State Railroad Commission. The securities are intended to reimburse the Union Oil Company for money advanced.

The harbor company is also authorized to sell \$2,000,000 of class "B" preferred stock and to use not exceeding \$500,000 of the proceeds to pay the cost of extensions and improvements to the harbor company's plant. The balance of the fund received from the sale of the class "B" stock is to be placed in a special deposit and used only for such purposes as the commission, may authorize in supplemental orders.

HIGHER PRICES

Estimating that the California prune crop this season will not exceed 60 per cent of the last year's crop, the California Prune and Apricot Growers' Association has announced a higher price list on its sweet carton prunes. The revised quotations run from \$5.85 a dozen to \$7.75 for the cartons in various sizes. The new crop will not be ready for delivery before November.

FREIGHT RATES

Reduction in westbound transcontinental freight rates running from \$1.48 to 61 cents on a list of commodities originating in California.

You Know Los Angeles Invest in a Home Utility

The people of Los Angeles and surrounding towns are well acquainted with the Los Angeles Gas & Electric Corporation. Its extensive properties occupy many acres with enormous gas holders whose height makes them landmarks in the sky line of the city. Its electric transmission lines spread over a wide territory, bringing power for the daily needs of many people.

This corporation carries on a large and profitable gas and electric business in Los Angeles and controls all the gas business of Pasadena, South Pasadena, Monterey Park, Alhambra, San Gabriel, San Marino, Watts, Huntington

Park, Hyde Park, Hawthorne and Inglewood—serving a total population estimated at about 1,030,000.

Investment in this utility will stimulate home industry. Your surplus funds invested in the bonds of this company will provide more homes and industries with gas and electric power and at the same time give you a safe, well-secured investment with regular and dependable income assured.

We offer Los Angeles Gas & Electric Corporation 6 1/2% Bonds, due 1943, at 97.75 and interest. Write, telephone or call at our office for full information.

NEWS ITEM

Government Decline
(By A. P. Night Writer)
NEW YORK, April 26.—Continued strength of foreign government bonds and selling of the U. S. government bonds featured today's trading in bonds on the New York Stock Exchange. Market observers were undecided as to whether the offering of the United States Government bonds is influenced by expectation of higher rates for the government's May financing or reflects commercial needs on the part of the bondholders.

The declines ranged from 1-3/4 to 2-3/4 of a point and affected all the active issues with the exception of the second Liberty 4-1/2s and the Victory 3-4s, the former advancing 1-3/4 of a point and the latter being unchanged.

A gain of 2 points by Reading General 4s featured the trading in the railroad mortgages. New York Railways refunding 4s, 5s, 6s, 7s, 8s, 9s, 10s, 11s, 12s, 13s, 14s, 15s, 16s, 17s, 18s, 19s, 20s, 21s, 22s, 23s, 24s, 25s, 26s, 27s, 28s, 29s, 30s, 31s, 32s, 33s, 34s, 35s, 36s, 37s, 38s, SIMON LEVI CO., Distributors

Selection Maps to be Distributed Tomorrow

Land Selection Maps will be distributed to holders of Palos Verdes Convertible Subscriptions, beginning tomorrow.

Call at any of the offices listed below, present your receipts or priority cards, and receive your map. All offices will be open until 10 P. M. tomorrow night, and all day Sunday. Men who know the project thoroughly will be there to explain the maps and selection plan and give you all the information you need to enable you to select your homesite.

Get Your Maps First

Be sure and get your Selection Maps from one of the offices listed below before you go to the property. No maps will be distributed there.

FOREIGN FILM INDUSTRY CITED

Little Competition Held to Be Probable

Dramatic Values Said to Be Baffling British

Tendency is to Weed Out Low-Class Productions

European motion-picture production will never seriously compete with America; the industry here will continue to absorb the leading mentalities of the foreign field, and the bloc system which heretofore has worked great hardship on American pictures in England and on the continent, has finally been broken.

This was the message brought back from New York by R. P. Shulberg, who had an extensive conference with Al Lichtman, head of the distributing organization of the Preferred Pictures Corporation, who recently completed a tour abroad surveying distributing conditions.

"Formerly England was a year behind in the exhibiting of American pictures," Mr. Shulberg said. "The bloc system harmed us for it meant that they bought their entire year's output in advance, good, bad and indifferent pictures, and on big productions the picture was not shown sometimes for more than a year after it was released here. But now pictures are released almost as soon as they are here."

"Shadows," one of our big pictures, was playing to capacity houses in England a month after it was released here.

SMALL FACILITIES

Mr. Shulberg pointed out that the English have not the facilities for picture-making that we have here, and that even if they do import American stars, directors and others the exorbitant price which they will be forced to pay for their services will place them on an uncompetitive basis.

"Foreign companies don't seem to be able to get the co-operation so necessary to the successful production, especially in the mechanical and electrical departments," Mr. Shulberg said. "Technically, their idea of story construction is wrong. The motif is often fallacious and utterly impossible. Their sense of dramatic values does not appeal to the public. It is much more logical to bring the leading lights of their industry over here, for it has been found impossible to consolidate the two elements over there."

OVER PRODUCTION

"We ever planning of film 'The Amateur Gentleman,' but found an English company had ruined it for our taste. Eventually the English have made their way into their own theaters but not to any appreciable extent. The people are not interested in the world over. What is big here will be big there; what dies here will die there."

Mr. Shulberg stated that generally producers were looking for a little over production this year and while this would work a hardship in loss of rentals, in the end it would work to advantage by weeding out the incompetent producers and bad pictures.

"The cry is not for a good picture at a high price, but a good picture at a fair price. The average standard of the theater is much higher this year than last and during the next twelve months we will see the natural process of elimination at work. The poor or mediocre picture hasn't a chance this year."

OBREGON TO BE GIVEN FILM

President of Southern Republic Accepts Offer of Mexican Picture from Neilan

Following a series of dispatches via diplomatic channels, President Obregon will receive from Marshall Neilan, prominent motion-picture producer, film scenes staged recently in Mexico for the director's new photoplay, "The Eternal Three." The motion pictures will become part of President Obregon's official library and this will mark the first time that an American film producer has been so honored. Appearing in these scenes, directed by Frank Urson, are Hobart Bosworth, Claire Windsor and other popular American film players.

In accepting the offer from Mr. Neilan, the President of Mexico expressed his desire to tender every co-operation to motion-picture producers in America who plan to make pictures concerning Mexico and the Mexican people.

In his dispatch to his American representative, Zach Lamar Cobb, in the Bank of Italy Building, President Obregon said, in part: "Thank you for the exquisite courtesy of Mr. Marshall Neilan in tendering me a copy of 'The Eternal Three' picture. I have already addressed myself to the Mexican Consul in Los Angeles requesting

ture at a high price, but a good picture at a fair price. The average standard of the theater is much higher this year than last and during the next twelve months we will see the natural process of elimination at work. The poor or mediocre picture hasn't a chance this year."

PLAN EXPANSION

Mr. Shulberg announced a plan of expansion at the studios which will embrace the filming of twelve pictures during the next year starting in September. Heart-throb pictures, which have been exclusively specialized on at the Shulberg lot, will continue to be made but will represent only half of the productions. These pictures, it is planned, will be comedy-drama and three will be special productions.

Mr. Shulberg also announced that Larry Evans, nationally known novelist, had been added as a special writer to the scenario staff and is expected to arrive in two weeks. The Shulberg firm will have exclusive right to all his work.

SCENARIO COMPLETED

Theme of "The Wanters" Gives Society Life Exposure

Working in conjunction, J. G. Hawks, managing editor of Mayer Studio, and Paul Bern, free lance screen writer, yesterday completed the scenario for "The Wanters," a Lella Burton Wells story which John M. Stahl will produce for Louis B. Mayer.

Mr. Stahl already has started making the picture, filming some of the smaller episodes in the early part of the story. Photographed by Ernest G. Palmer with a cast headed by Milton Fromson, Norma Shearer, Robert Ellis and Gertrude Astor, the theme presents an exposure of New York society life, and points out the evils attached to being a chronic "waster" and moneyed idler.

The body of Jess Forbes, sailor, was recovered by divers in Los Angeles Harbor yesterday afternoon. Forbes fell overboard and drowned last Sunday afternoon, in the collision between the tug Bahada and "cruiser" Richmond. The Bahada, on which Forbes was a sailor, was waiting to receive a towline, when the Richmond, coming in empty, crashed head-on with her. The crew of five was thrown into the water, and the Bahada sank at once. The other was rescued.

BODY OF SHIP CRASH VICTIM RECOVERED

The body of Jess Forbes, sailor, was recovered by divers in Los Angeles Harbor yesterday afternoon. Forbes fell overboard and drowned last Sunday afternoon, in the collision between the tug Bahada and "cruiser" Richmond. The Bahada, on which Forbes was a sailor, was waiting to receive a towline, when the Richmond, coming in empty, crashed head-on with her. The crew of five was thrown into the water, and the Bahada sank at once. The other was rescued.

LAST CONCERT of Season Is Well Played

Monday evening the Zoellner Quartet gave their last concert of the season at the Elbell clubhouse, demonstrating their artistry and musicianship. The audience gave warm tribute to their renditions. The Haydn "Quartet Op. 64, No. 5" is a lovely and graceful classic, and, indeed, the Zoellners played with both beauty and elegance. The pure classic harmonies in even rhythm present a message at once positive and beautiful.

The second number was "Quartet in E Minor," by Rimsky. The work is strong and meaty, and nicely contrasted the remainder of the program. Following, the "Serenade Op. 56," by Schindler, for two violins and piano, was given. Although Schindler is pretty, there is apt to be no great depth, and the serenade proved to be no exception. The number was well played by Antoinette, Amanda and Joseph Zoellner. "Genius Loci," by Carl Thiem, was played as an encore.

LET'S GO

Big Free
Celebration

BRIDGE OPENING

Saturday, April 28

The new "Short-cut Highway" between Pasadena and Long Beach will be opened to the public.

This is a direct route between Pasadena and Long Beach, via Maywood, Bell and Cudahy.

PROGRAM

Beginning at 2 P. M.,
Saturday, April 28th

Big Prize Parade
Big Novelty Acts
Band Concerts
Street Dance

ALL FREE

You are invited to be our guests, and to meet us at Legion Ball Park, on Cudahy Avenue, in Maywood.

Come early and stay late

Free street dance at Slauon
and Cudahy, from 8 to 11 p.m.

How to Get There

From Pasadena, Alhambra and East Los Angeles—south on Pasadena to Telegraph Road, then east to the new thoroughfare which will be plainly marked, thence south to Legion Park.

From Los Angeles—drive to Slauon Avenue, thence east to Cudahy, and north four blocks to Legion Park.

From Long Beach—north on Long Beach Boulevard to Tweedy Road, thence east and north to the new bridge.

By way of Pacific Electric from Los Angeles—Sixth and Main Street Station—take Whittier car to Baker Station. Free auto service from that point to grounds.

People and Their Trouble

LETTERS TO
THE TIMES

Makes an Exception

LOS ANGELES, April 17.—[To the Editor of The Times:] I wish to convey a word to the gentleman that spat out of an incoming Hollywood car window at 8:46 a.m., this morning as it emerged from the Hill-street tunnel. I was standing on the sidewalk at the time. I wish to assure the gentleman that question that he did not spit on the sidewalk and thus violate any city ordinance, and I am very glad to stand there any other morning this week to receive his expectations. But let me tell him that after the expiration of Courtesy Week he can only continue to do this at his imminent peril.

JOHN K. HARGRAVES.

Darwinism Dead

LOS ANGELES, April 24.—[To the Editor of The Times:] If Mr. R. Hoing will correspond with any of the leading scientists he will discover that Prof. Huxley, the greatest living biologist, gave the death blow to Darwinism in Toronto in 1921, when he said there was not a single proof in biology of the doctrine of natural selection. It is a pity that all the leading evolutionists of the world have given up Darwinism, although they cling to the unproven hypothesis of evolution.

It is admitted by all scientists that all evidence to produce one species into another have signally failed. The horse and mule, the mule is a hybrid and cannot produce itself. The Bible law of reproduction "after its kind" is the acknowledged law of nature. All discoveries of true science only confirm the accuracy of the statements of the Bible.

A careful reading of the measures of the Motion Picture Industry, will show that the ten cubits diameter was from one outer brim to the other, while the circumference was the measure of the inner.

side of the brim, so being mathematically correct. It is a surprise to hear that the Bible says the universe was created 5182 years ago. In Gen. I we read: "In the beginning God created the heaven and the earth." That may have been millions of years ago. In the second verse the earth, which was created perfect, has become a ruin, and the six days is the restoration of the earth for the habitation of man.

If Mr. Hoing will "hoo" more deeply in the fields of science and the present-day evolutionists have discarded Darwinism as a discredited theory and will not again make the mistake of taking the unproven data in a reference seriously as being a part of the inspired Bible.

J. J. SIMS.

Fatal and Absurd

LOS ANGELES, April 24.—[To the Editor of The Times:] As a nonresident of this city, but one who has his eye very much on the time headed this way, I am wondering just what may happen on May 1, when a most serious question is to be settled by the voters of Los Angeles.

A group of men who, I believe, are acting absolutely from selfish motives, are proposing a substitute for the city electric railway system hundreds of miles of motor cars to add to the already seriously congested thoroughfares.

Every man and woman who is proud to live here, who takes personal pride in the city's development, can't do other, won't do other than vote against the proposition to do away with the transportation systems which have more than paid for themselves.

Just as well talk about tearing up the railroad tracks throughout the State of California to make room for passenger buses and freight cars in the extent and magnitude of the proposition. The one is just as fatal and absurd as the other.

Mr. McAdoo, through his political prominence and reputation as an engineer, the construction of the New York subway, succeeds in his efforts to supplant the street cars with the proposed motor cars as the means of transportation in the time the people of Los Angeles would join in a greater demonstration in welcoming his departure than they did on the occasion of his coming.

I have traveled over the United States and in some foreign lands and nowhere have I seen buses in use as the means of transportation in any city.

Des Moines, a city that sometimes gets behind herself, tried buses. She left the decision in the hands of the people, and they declared with a considerable majority that they wanted to see all the street-car rails dug up. Three months was enough of the experiment. Des Moines would be poor territory for McAdoo to try after he finishes with Los Angeles.

C. L. DOTSON.

Forced Self-Defense

LOS ANGELES, April 20.—[To the Editor of The Times:] As a solution to the many daylight hold-ups, I would suggest that our proper authorities instead of bidding our citizens carrying concealed weapons pass a law requiring every able-bodied citizen drive both daytime and nighttime to carry on his person, concealed from view, a pistol. There is, in my mind, no doubt, that the effects of such a law would be instantaneous in curbing both daytime and nighttime hold-ups. If the criminal element knew that every man walking along the street, every man driving an auto had with him the means of a healthy resistance he certainly would think twice before taking the chance he will take today when he knows that all law-abiding citizens go armed. People are compelled now days to see either pedestrians or drivers held up boldly without being able to make an effort to stop the crime. What would be the result if they were armed. Many a man would take the chance to stop the criminal. True there would be a good many stray bullets and probably some innocent persons would get hit but in the end a great deal of crime would be abated.

It will probably be argued that when the criminal knows that the citizen is armed he will take no chance but knock his victim on the head with a blackjack. In many cases he does this anyway. Make every man a guard of both his own person and estate and that of his neighbors and you will increase crime quickly and materially.

GEORGE W. BUSH.

Scientific Science

LOS ANGELES, April 21.—[To the Editor of The Times:] In the issue of April 12 under the heading "Leger to the Times" a correspondent named M. J. Sims insists upon a contradiction, which in the name of science, I will seek to rectify and clarify.

Mr. Sims takes exception to Prof. Milikan's statement that, "evolution is science" and brings as proof, statements of Spencer and Kelvin. In Mr. Sims' opinion of the fact that in terminology, is latent the cause of three-fourths of all the dissension and difference of opinion, evolution is a department of science, which definition in no way contradicts Spencer or Kelvin.

And now to the main question. Mr. Sims states that two great axioms of science which relegated evolution to the ash-can are: Life must proceed from life, and "One species cannot be transmuted into another species." These two statements are absolutely agreeable to both science and personal opinion.

Yet Mr. Sims strongly implies that the story of creation as related in Genesis is indubitable and might safely be accepted as a scientific fact. He goes further and says that the evolutionist seeking the truth denies the duty of Christ and rejects the Bible.

But Mr. Sims, if "Life proceeds only from life" (refer to preceding paragraph) how, in the name of all that is miraculous, could the world have been created in six days, or years, or eons, out of nothingness? Life is eternal—is not each aspect of life eternal? You quote Spencer; what has he to say of the destructibility of matter? If it cannot be destroyed it must be ever-existent or eternal even as life, of which matter is an aspect.

Secondly, no scientist of repute (ok otherwise) maintains any such nonsense as the transmutation of species any more than a scientist believes in the age-old alchemy of transmutation of metals. As one ascends the ladder of life he assumes a physical body in keeping with the state of matter. The required knowledge is assimilated, another body is assumed for higher states. That is re-embodiment, not transmutation.

"There is no religion higher than truth."

HERBERT S. POLAN.

URGENT HASTE ON HYDRANTS

The Public Service Commission has been ordered by the City Council to make as great speed as possible in the installation of 500 additional fire hydrants. The request was issued by the Council on the strength of a recommendation from the Finance Committee for the purchase of the hydrants, which are held to be urgently needed.

Questions
Answered

[Any reader can get the answer to any question by writing Los Angeles Times Information Bureau, Frederic J. Rankin, Director, Washington, D. C. 20540. Please state question clearly and briefly. Give full name and address and inclose 3 cents in stamps for return postage. All replies are sent direct to the inquirer.]

Question: How many railroad ties are necessary for United States railroads? H. W. C.

Answer: Assuming that 2500 ties per mile of track are employed on the average, then the 250,000 miles of railway track in the United States require 625,000,000 ties. The annual consumption in about 75,000,000 ties for renewals and 14,000,000 ties for new construction. A total of 89,000,000, or of nearly 360,000,000 cubic feet of timber.

Q: Where does the cashew nut come from? F. C. S.

A: The cashew grows in most tropical countries. The nuts of this variety that reach this country are usually from India, but Portuguese colonies in Africa have a supply that is available.

Q: How long have oxygen tanks been used for rescue work in mines? L. P.

A: The Bureau of Mines says that such apparatus came into use about 1867. In October, 1908, an oxygen helmet was used in fighting a mine fire. Helicopters have been supplied with apparatus of the mouth breathing type. Many mines now have this life-saving device, and in some what the equipment is compulsory.

Q: Is it a fact that the Chinook salmons which are found in the Pacific Ocean and Columbia River die after depositing their eggs in the small stream? R. K.

A: The Bureau of Fisheries says it is a fact.

Q: How much of the tea sent to this country is rejected at the port of entry? A.

A: In 1922 less than 2 per cent was rejected by examiners. This amounted to 1,820,182 pounds. Most of this was not of standard quality, only 248,802 pounds being rejected because of impurities.

Q: In what way is a cut-out a help to an automobile? G. C. M.

A: It aids in taking back pressure off the cylinders on grades and hills.

Q: Who discovered the Philippines? M. L. C.

A: Magellan discovered the islands on March 16, 1521. He named the group of islands the Archipelago of St. Lazarus. In 1542 the name was changed to Philippines in honor of Philip II of Spain.

Q: How does the population of Canada compare with that of New York City? C. J. U.

A: New York City with its suburbs has practically the same population as the Dominion of Canada.

Q: To rectify and clarify.

Mr. Sims takes exception to Prof. Milikan's statement that, "evolution is science" and brings as proof, statements of Spencer and Kelvin. In Mr. Sims' opinion of the fact that in terminology, is latent the cause of three-fourths of all the dissension and difference of opinion, evolution is a department of science, which definition in no way contradicts Spencer or Kelvin.

And now to the main question. Mr. Sims states that two great axioms of science which relegated evolution to the ash-can are: Life must proceed from life, and "One species cannot be transmuted into another species." These two statements are absolutely agreeable to both science and personal opinion.

Yet Mr. Sims strongly implies that the story of creation as related in Genesis is indubitable and might safely be accepted as a scientific fact. He goes further and says that the evolutionist seeking the truth denies the duty of Christ and rejects the Bible.

But Mr. Sims, if "Life proceeds only from life" (refer to preceding paragraph) how, in the name of all that is miraculous, could the world have been created in six days, or years, or eons, out of nothingness? Life is eternal—is not each aspect of life eternal? You quote Spencer; what has he to say of the destructibility of matter? If it cannot be destroyed it must be ever-existent or eternal even as life, of which matter is an aspect.

Secondly, no scientist of repute (ok otherwise) maintains any such nonsense as the transmutation of species any more than a scientist believes in the age-old alchemy of transmutation of metals. As one ascends the ladder of life he assumes a physical body in keeping with the state of matter. The required knowledge is assimilated, another body is assumed for higher states. That is re-embodiment, not transmutation.

"There is no religion higher than truth."

4 Men in
Bald at 40
yet 91% need

Science discovers falling hair due to simple infection (Sebum). Now quickly overcomes it.

Written Guarantee to Grow Hair
Under Our 3-Bottle Treatment Plan

This is to offer you, under absolute money-back guarantee, the new Van Ess treatment, which under scientific tests, grows hair on 91% of bald heads in 100 days. It guarantees you a chance of loss.

Remove Sebum

For years science endeavored to combat infection (Sebum). Finally a scientific way was discovered. It is applied to the scalp of the hair. It removes the sebum and restores the hair. It grows new hair in most cases. It is a scientific way. It is applied to the scalp of the hair. It removes the sebum and restores the hair. It grows new hair in most cases.

Hair Roots Rarely Die

Records show 4 men in 100 are bald. It is not a disease. It is merely a condition of infection. It is not a disease. It is merely a condition of infection. It is not a disease. It is merely a condition of infection.

Remove this fact and mark it. It is merely a condition of infection. It is not a disease. It is merely a condition of infection. It is not a disease. It is merely a condition of infection.

Under most bald scalp the hair roots live. An infection to authorities this is true.

VAN ESS LABORATORIES, 5007 Lake Park Avenue, Los Angeles, California.

Are You the Lucky
One in Five?Not if your Gums
Bleed Easily

Tender, bleeding gums! That's Nature's warning. Pyorrhea is about to strike.

It claims four persons out of every five past forty, and thousands younger, robbing them of precious teeth and sapping their priceless health.

Don't wait. Form the habit of strict oral hygiene now. Go to your dentist regularly for tooth and gum inspection. Brush your teeth with Forhan's For the Gums—a healing dentifrice that when used in time and used consistently, will prevent Pyorrhea or check its progress.

Forhan's For the Gums is the formula of R. J. Forhan, D.D.S. Used as a dentifrice, it will keep your teeth white and clean and your gums firm and healthy. It is pleasant to the taste. At all druggists, 35c and 60c in tubes.

Forhan's For the Gums is the formula of R. J. Forhan, D.D.S. Used as a dentifrice, it will keep your teeth white and clean and your gums firm and healthy. It is pleasant to the taste. At all druggists, 35c and 60c in tubes.

— HOUSES —

This image shows a vertical strip of film, likely from a microfilm reel. The film is dark and has a textured appearance. On the right side, there are several circular perforations, which are typical for microfilm to allow it to be wound onto a reel. The film strip is oriented vertically, and the perforations are spaced evenly along the right edge. The overall image is in black and white, emphasizing the texture and the circular patterns of the film.

AGED WOMAN GETS DIVORCE

Spouse Pleading Desertion Wins Decree

Took Twenty-eight Years to Decide Step

Hesitatingly Tells Story of Mate's Idleness

It took twenty-eight years for Mrs. Katherine H. Scribner, 81 years of age, to get up sufficient "spunk" to sue for divorce, she testified yesterday in Judge Summerfield's division of the Superior Court. But she finally managed it, she said, and was granted a decree from Edward A. Scribner.

Attired in the style of fifty years ago, the little woman, wrinkled and pathetic, told her story haltingly to the court. She hesitated frequently in her recital and seemed ashamed of her presence in the courtroom.

Smiling at intervals at Judge Summerfield, the aged woman said:

"Don't mind my manners, please Judge. I've been trying for twenty-eight years to get the courage to come to court so, Judge, if I make a few slips you won't mind me, will you?"

JUDGE SYMPATHETIC
"No, Madam," Judge Summerfield replied. "We are here to relieve heartaches. Don't be afraid."

"I am not exactly afraid, Judge, but I think divorce is a disgrace. I've been brought up to believe this and I would not have sued for divorce except that I just had to. When I was a young girl people just kind of stayed away from people who had been divorced. It ought to be that way now," she said.

Then she told her story. Shortly after the Civil War, she said, she became the bride of a wounded hero. A child came and soon after the veteran died.

"I was left with a child and set out to make my own living," she continued. "On Christmas day of 1873 I married Ed. I loved him very much, Judge, and thought he was a good man and would care for me and my child."

REFUSES TO WORK
"He was sweet and kind at first, but I believe, Judge, that he was all for the sake of appearance. At first he couldn't find work and blamed his idleness on hard times. Then he became callous. I was told I ought to get a divorce, because he started drinking and refused to work, but I thought divorce such a disgrace that I refused to do it. I kept on working to support us all."

"I am not as pert and can't work as much as I used to, but if I get a divorce I can get a pension from the government because my first husband was a soldier. You see, Judge, it is necessary that has driven me to the divorce courts." Mrs. Scribner said her husband deserted her on June 4, 1895.

Doctor Seized at Calexico on Check Charge

Charged with passing bad checks, Dr. C. F. Barker, former Los Angeles physician, was arrested Wednesday night in Calexico on a telegraph warrant issued by the District Attorney's office, this city.

Telegraphic reports assert the prisoner is wanted in many parts of the State for similar alleged offenses.

According to Calexico police, Barker arrived in that city several days ago, professing his intentions to open a sanatorium. Notification of his arrest was received by the Sheriff's office, and it is expected he will be brought back to Los Angeles.

The specific charge with which the physician is charged in the warrant in that of passing a check for \$100, drawn on the Pacific Southwest Trust and Savings Bank, Los Angeles, and presented to L. R. Plam, proprietor of the Hotel Balboa. At the bank it was said Barker had \$12 to his credit.

Thief Purloins Pants and Cash in Pullman Car

PORTERVILLE, April 24.—B. E. Minister, Porterville merchant, returning from a trip to Los Angeles, reached down to the foot of his berth early in the morning, preparatory to donning his trousers, only to discover them missing. Victims of prowling through the sleeping-car in disabillie or waiting under the blankets until some one came to his aid were all the more disturbing by the fact that the very necessary garment had most of his ready cash in the pocket.

Minister summoned the porter, who finally returned with a pair of trousers of a different color and much larger size than his own missing wardrobe. They were gratefully received and the search began in earnest. Minister's trousers and those of another man were finally discovered tucked under a seat, pockets turned out and even their tickets found.

Porterville was near and Minister leaves a sigh of relief. Not so the other man. Home for him was far away and his loss was \$70.

The only remedy that can possibly be had is the opening of new streets or the rerouting of street cars, he said.

"It is a brutal thing to say, but we hope that service through the congested district will be done so bad that public-service officials will agree to let us reroute street cars," Mr. Anderson said.

Mr. Anderson said he had virtually all of his cars go through the business district. This is not necessary to good service. We can not move our cars fast enough. If cars were not stopped and delayed by automobiles it would be an easy matter to prevent congestion, so the trouble is not with the street cars alone. The buses would add to the congestion.

Los Angeles has a smaller percentage of its business district converted into a thoroughfare than any other large city in the United States, he said. Approximately 25 per cent of the business district in Los Angeles is given over to streets, he said, and in most cities it is about 40 per cent.

GREAT LOSS SEEN

The bus company seeks to emphasize the electric-railway company although it denies it.

"It is obvious to anyone familiar with transportation that buses will cause the Los Angeles railway company to grow larger," the bus company said.

The short-haul traffic, where we make our profit, and leave us to the long haul. We lose money in carrying passengers great distances, but make up for it in the short rides."

Pages of statistics were presented by Mr. Anderson. He declared that the largest tax which would be realized by the city from the buses would be about \$70,000. The electric railway company pays taxes amounting to \$1,000,000, he emphasized. The car company is forced to pay a large portion of the cost of new viaducts and bridges. Mr. Anderson continued, "All the bus company wants is not have to pay any share in this street cars carry school children at a loss, and provide free transportation for law officers, firemen, municipal employees and mail carriers. The buses will give free transportation to firemen and policemen only, provided not more than two board one bus at one time."

"We know our service is not perfect," Mr. Anderson said, "but we know it would be worse if we had buses. Mr. McAdoo forgot to tell you that in London and New York the buses are controlled by the city companies. That is why they are operating with a fair degree of success. Following are the leading statements made by those favoring the proposed ordinance, and that is the last one."

NEW AVENTES NEEDED
In the discussion which followed, Mr. Anderson stated there was no possible remedy for traffic congestion in Los Angeles until new avenues for traffic were opened. He stated he was in favor of subways and elevated tracks.

One member of the club asked Mr. Anderson if he did not think it would be wise to remove seats in some of the cars and carry more passengers. "I ought to be braced if I should ever make any such inhuman proposition," he replied.

Proceeding Mr. Anderson's address, the annual business meeting of the club was conducted, with the election of the following officers: David Woodhead, president; George Barlow, vice-president; and Alexander Mackeligan, treasurer.

ANAHEIM SEWER BONDS ARE SOLD

The \$150,000 sewer construction bond issue of the city of Anaheim was sold yesterday to R. H. Moulton & Co. on a bid of par and premium of 1927. It was stated last night by officials of the company. The bonds carry 5 per cent interest and are to mature in 1942 with annual payments. Other bidders were William R. Scott, who offered a premium of \$2,000, and First Security Company, 2553.

PARTNERS IN POVERTY

Maxim Korky, the Russian novelist, and Chalupin, the newest great discovery in the operatic world, were brought up in the same poor-class street in Kazan, the capital of an eastern province of Russia.

FLAWS SEEN IN BUS ARGUMENT

Trolley Manager Says Lines Will be Paralleled

Thinks New Company Would Get Best Paying Trade

Definite Service Guarantees Not Given, He Declares

Addressing members of the Municipal League exactly two weeks before the appearance of W. W. McAdoo before the organization in behalf of the proposed ordinance, which would grant to the People's Motorbus Company a twenty-one-year franchise, George Barker, transportation manager of the Los Angeles Railway Corporation, last night took issue with the representative of the bus company on every part of his argument, and declared that actions of eastern capitalists who are backing the bus company "have been inconsistent."

The entire argument put forth by the Hellman interests has been inconsistent, Mr. Anderson said, and citizens so far have failed to get a definite guarantee of service. Although some of the bus company have declared that the buses will not operate in congested districts, Mr. McAdoo stated that the buses will not crowd automobiles off the streets, since they will stop on the opposite side of the street to take on and let off passengers at such corners as Broadway and Seventh streets, Mr. Anderson stated.

STATEMENTS IN CONFLICT

"Again Mr. McAdoo has stated that the buses will not operate in competition with the street-car company," he said. "Yet other spokesmen of the organization have said otherwise. More than 40 per cent of the routes over which the buses are planned to be operated possess one line to operate on Hollywood Boulevard in Hollywood, down to the intersection of the Hollywood Boulevard and the city streets, and yet declare that the People's Motorbus Company will not operate on that route."

The motorbuses would in no way relieve traffic congestion, as the congested district is caused by the physical condition of the business district, Mr. Anderson declared.

The only remedy that can possibly be had is the opening of new streets or the rerouting of street cars, he said.

"It is a brutal thing to say, but we hope that service through the congested district will be done so bad that public-service officials will agree to let us reroute street cars," Mr. Anderson said.

Mr. Anderson said he had virtually all of his cars go through the business district. This is not necessary to good service. We can not move our cars fast enough. If cars were not stopped and delayed by automobiles it would be an easy matter to prevent congestion, so the trouble is not with the street cars alone. The buses would add to the congestion.

Los Angeles has a smaller percentage of its business district converted into a thoroughfare than any other large city in the United States, he said. Approximately 25 per cent of the business district in Los Angeles is given over to streets, he said, and in most cities it is about 40 per cent.

BUILDING FIRM SETS UP RECORD IN CONSTRUCTION

A new building record, which will probably furnish a mark for contractors and builders to aim at for some time to come, was hung up yesterday afternoon when the Second Engineering Company completed the entire framework of the Hotel Rossier, thirteen-story structure at Fifth and Main streets thirty-six days after the work was commenced.

At the time the work was begun it was expected that the building would be ready for occupancy in December, but with the work progressing so rapidly it is thought that it may be opened one or two months before that date.

JIMMY HACKLEY WINS FROM JACKIE NORMAN

(EXCLUSIVE DISPATCH)
LOS ANGELES HARBOR, April 26.—Jimmy Hackley, featherweight champion of the Pacific Coast, defeated Jackie Norman of New York in the main event of the C. P. O. club's boxing bout here tonight. In the semi-final bout Red Uhlman got a draw with Sailor Hendricks, all-Navy, middleweight champion, but most of the fans thought Uhlman had the shade.

Danny Duarte of the U.S.S. Nevada and George Sherman fought a fast draw. Frankie Munroe trimmed Sailor Paddy McNulty, former featherweight champion of the Atlantic Coast, in the best fight of the night. Sailor Jones won from Cyclone Victor after being knocked down three times in the first round. Young Burns won a decision over Sailor Osgood of the U.S.S. Tennessee in the opener.

TROJAN AND BRANCH MATMEN BREAK EVEN

The University of Southern California and Southern Branch mat teams broke even in their matches held last night in the Cubs' gym. Each team won three matches, while one was a draw. Capt. Walsh of the Branch tossed Musto of U.S.C. in the feature tilt of the evening. Following are the results: Curtis (S.B.) and Graves (S.C.) 125 pounds; a draw; Barney (S.C.) threw Ridgeway (S.B.) at 125 pounds; Hughes (S.B.) tossed Sharp (S.B.) at 135 pounds; Chaney (S.C.) won from Torensky (S.C.) on a foul at 155 pounds; De Paesthorst (S.C.) tossed Outcall (S.B.) at 145 pounds; Packard (S.B.) threw Barck (S.C.) at 145 pounds; and Capt. Walsh (S.B.) pinned Musto (S.C.) to the mat at 155 pounds.

FRANKIE GARCIA NOW HAS A WIFE

(EXCLUSIVE DISPATCH)
MEMPHIS (Tenn.), April 24.—Frankie Garcia, the Los Angeles featherweight, and Miss Nina Krier of Memphis are married. It became known today. Garcia and his bride motored across the river to Marion, Ark., last Monday, where the nuptials were performed.

STREET CAR BEAT UP

A masked man held up a Brooklyn-Hopner street car at the end of the line last night and robbed the conductor and motorman of \$10, two watches and a conductor's punch, according to reports to police. No passengers were on the car.

CORNERS

Lift Off with Fingers

Monday, April 27

You Can

Imitation

Lamp

Standard

\$4.98

Doesn't hurt a bit! Drop a little "Freestone" on an aching corn, instantly that corn stops burning, then shortly you lift it right off with fingers. Truly!

Your druggist sells a tiny bottle of "Freestone" for a few cents, sufficient to remove every hard corn, soft corn, or corn between the toes, and the calluses without soreness or irritation.—(Advertisement.)

DEAD MAN'S KIN SOUGHT

Search is being made here for relatives of Charles Center Smith, who died of heart disease in Tucson on the 15th inst. Word was received yesterday at the Sheriff's office that \$100 in cash was found in Smith's clothes after his death. So far no one has claimed the body, which lies in a morgue in Tucson. A badge for a special deputy sheriff for Los Angeles county also was found. Investigation here showed that Smith once lived at 3209 1/2 Griffith avenue, but no one at that address could give any information about him.

SOVIETS SEIZE PLAYERS

Screen Dancer's Sister is Among Company Held After Russians Halt Making of Picture

Cinema art is long and life is short—in soviet Russia. The land that gave the world dictatorship of the proletariat and the experiences of Mile. Murza Baranova, pretty Russian artist and dancer, now in this government and the players taken into custody.

"My sister is making frantic appeals for help," Miss Baranova said at her home, 821 South Vermont avenue. "I know that she is suffering, but I am at a loss to know what to do. June was just a beginner when I was making the studios in Russia is a hard one. The old saying that art is long and life is short certainly holds good there."

Since arriving in this country Miss Baranova has done some dancing for the screen and has had various roles in American productions. She is a sister of Miss. Fidler, noted pianist, now in Honolulu, and is said to be a member of a well-known Russian family. The letter carrying her sister's appeal for help was decorated with Russian stamps calling for nearly 1,000,000 rubles.

DIRECTOR IS ARRESTED

When the picture was finished the Soviet Censorship Commission paid a visit to the studio, viewed the picture, and threw Director Kharitonov and his company in the city bastille. Another commission, after much red tape, released the picture, and without losing much time the entire company headed for Constantinople. From there Miss Baranova came to the United States.

A few days ago Mile. Baranova received a letter from Russia advising her of the arrest in Odessa of her 17-year-old sister, June Baranova, on the charge of participating in the dining of a motion picture which the soviet censors held to be inimical to the dictatorship of the proletariat.

The letter, Mile. Baranova said yesterday, stated the studio of the company, located at 24 Boulevard La France, Odessa, was raided by

Westwood

Built Upon Twenty Two Years of Success

Twenty-TWO YEARS ago the Janss Investment Company, consisting of two people, was formed for the purpose of subdividing land in and surrounding Los Angeles into homesites and farms.

Today, on its twenty-second anniversary, with an executive and selling staff of more than two hundred people, and correspondingly large engineering, improvement, development and ranching departments, this Company points with pride to a series of successful subdivisions, from the Valleys to the Sea.

In all our twenty-two years of advertising and selling it has been our policy to buy land in desirable locations at a low price and to improve same in such a manner that purchasers have made substantial profits and remained permanent clients of this organization.

The culmination of our long list of successes is evidenced in Westwood—the new 3,300-acre city between Los Angeles and Santa Monica, where nearly \$3,000,000 in sales has already been transacted, seven miles of street and public utility improvements are rapidly nearing completion, and profits made for early buyers, in some instances, as high as 100% on the money invested.

For the past twenty-two years the Janss Investment Company has had a definite part in the upbuilding of this city and surrounding territory with its successful subdivisions.
